

Invergowrie Pack

species list

Your hiko tray of forty seedlings will include a selection of the below trees/shrubs, all of which are frost-hardy and suitable for dry soils

Wollomombi Wattle

Acacia blakei (formerly classified as *A. diphylla*)

2-13m

Happy in sandy soils with gravel and rocks in dry sclerophyll forest.

Blue Bush

3-6m x 2-3m

Acacia covenyi

Super hardy, rare, stunning foliage with bright yellow flowers. Great for hedges and bees.

Fern-leaved Wattle

Acacia filicifolia

3-14m

Fast-growing pioneer species.

White Sally/Gossamer Wattle

Acacia floribunda

2-8m

One of the best Acacias you can plant! Hardy; perfect for screening; beautiful flowers; excellent bird habitat; fast-growing—everyone wins!

Red Stem Wattle

Acacia rubida

2-10m

A good pioneer species: fast growing, hardy, cold-tolerant and nitrogen-fixing.

Sticky Wattle

Acacia viscidula

3m x 2m rounded shrub

Bright green foliage to the ground. Lemon yellow flowers late Spring and early Summer. Perfect for screening.

Black She-Oak

Allocasuarina littoralis

15m

Seeds are a favourite of the Yellow-tailed Black Cockatoos.

Rough-barked Apple

Angophora floribunda

30m

A profusion of Summer blossoms.

Blackthorn

Bursaria spinosa

3-4m

Ecologically valuable medium to large shrub.

Habitat for parasitic wasps that prey on Christmas Beetles

With fragrant white flowers, it is a vital food source for butterflies, moths and native bees.

Wild Rosemary

Cassinia quinquefaria

1-3m x 2m

A large, erect, aromatic shrub.

Sticky Hop Bush

Dodonaea viscosa

1-3m

A good understory plant; hardy once established.

Apple Box

Eucalyptus bridgesiana

20m

Honey produced from small, white flowers is of high quality.

Blakely's Red Gum

Eucalyptus blakelyi

20m

A tough, versatile ATG and koala favourite.

New England Stringybark

Eucalyptus caligonosa

25m

Species epithet is Latin for 'foggy,' misty or 'dark.'

Silver Top Stringybark

Eucalyptus laevopinea

40m

Prefers hilly areas in open forest.

Red Stringybark

Eucalyptus macrorhyncha

10-35m

Widespread distribution on relatively dry, poor soils of hills.

Yellow Box

Eucalyptus melliodora

30m

Tall, widespread tree suitable for honey production.

Sweet smelling flowers recorded year-round.

Narrow-leaved Black Peppermint

Eucalyptus nicholii

15m

Stunning feature tree with dark, furrowed bark and a weeping habit of slender, attractive leaves.

Flowering March.

Orange Gum

Eucalyptus prava

15m

Widespread small to medium-sized tree. Smooth bark in orange, brown and pink.

Flowering January.

Youman's Stringybark

Eucalyptus youmanii

20m

Medium-sized tree suitable for poor soils and growing in woodland.

Flowering February-March.

Tree Hakea

Hakea eriantha

10m

Fast-growing and suitable for wet climates or screening.

A favourite food-source of the Yellow-Tailed Black Cockatoo (*Calyptorhynchus funereus*)

Slender Tea-Tree

Leptospermum brevipes

4m x 3m

Fast-growing, hardy shrub with pendulous copper new foliage, small green-grey leaves and an abundance of small white flowers in Spring and Summer.

Jellybush

Leptospermum polygalifolium

0.5m-3m

Hardy and very florific with an abundance of white flowers.
